## **Induction Dynamics® SolidDrive® technology on display at INNOVENTIONS at Epcot**

### **Futuristic audio product added to House of Innoventions exhibit**

**Overland Park, Kan., October 25, 2007** -- Futuristic audio technology from **Induction Dynamics® SolidDrive®**, which transforms walls, ceilings, windows, floors and other surfaces into high-fidelity loudspeakers, is now showcased at INNOVENTIONS at Epcot at the Walt Disney World Resort in Florida.

The unique audio capabilities of **SolidDrive®** are being seen and heard daily at the House of Innoventions. The House of Innoventions showcases the newest trends in household technology and an array of labor-saving, ecologically sound and technologically advanced products. The House of Innoventions is located in INNNOVENTIONS East at Epcot. INNOVENTIONS is a unique 100,000 square foot interactive playground of hands-on, interactive exhibits where visitors from around the world discover how science and technology can simplify and enhance their lives today and in the future.

**SolidDrive®** utilizes very high-powered neodymium magnets and dual symmetrically opposed motors to produce sound from nearly any rigid or semi-rigid surface. From any home theater or stereo system, simply attach the **SolidDrives®** to walls, ceilings, windows, or wood floors and hear evenly distributed sound from the entire surface. In addition, **SolidDrive®** is effective in many business settings, including conference rooms and storefront merchandising.

"We're thrilled to be involved with INNOVENTIONS at Epcot," said Chris Combest, CEO of **Induction Dynamics®**. "It's fitting that **SolidDrive®**, which offers leading-edge audio technology for the home and office, is now showcased at the House of Innoventions, where guests from all over the world will be able to experience it for themselves."

Inside the House of Innoventions, two **SolidDrive®** devices are utilized to generate sound from two channels of a modern stereo system. An exhibit host or hostess informs guests about what they are seeing and hearing:

"Speaking of surprises, anyone surprised that I'm getting this great stereo sound without any speakers? Actually, they're hidden inside the wall. With just two of these **SolidDrive®** devices from **Induction Dynamics®**, we have transformed the entire wall into our speaker system."

### **About Induction Dynamics®**

**Induction Dynamics®**, founded in 1997, is headquartered in Overland Park, Kansas, where it designs, builds and distributes high-end audio products with only the most select components and materials. **Induction Dynamics®** uses

numerous unique and proven technologies, including its exclusive, patented S4X™ driver-control and other patents issued or pending. For more information, visit [www.soliddrive.com](http://www.soliddrive.com).

**About INNOVENTIONS at Epcot®**

Located in the heart of Epcot®, INNOVENTIONS is a unique attraction filled with hands-on, interactive exhibits. Visitors from around the globe discover how science and technology can simplify and enhance their lives today and tomorrow. This 100,000 square foot interactive playground provides guests with the opportunity to explore and discover innovative products and technologies from some of the world's finest companies and associations. From breakthroughs in farming and robotics to the latest in fire safety and plastics, INNOVENTIONS amazes guests as they experience how technological innovations will change the way we live.
